GABRIELA LEÓN

Multimedia Engineer | WordPress Web Developer
Bogotá, Colombia | Phone: +57 3156355990 | Email: gabrielasofialeon@gmail.com

PROFESSIONAL SUMMARY

Multimedia Engineer with 3+ years of experience building and managing websites and online stores, primarily with WordPress and WooCommerce. I combine technical skills in HTML, CSS, and JavaScript with web design experience and proficiency in Figma, allowing me to create functional, responsive, and visually appealing sites.

I have experience working with different CMS platforms, frontend customization, performance optimization, and on-page SEO. My profile blends development and design, allowing me to approach projects from both a technical and visual perspective.

I am collaborative, proactive, and eager to learn, with an ability to adapt quickly to new tools and work environments. I am interested in further strengthening my web development skills and expanding my knowledge of Machine Learning and Computer Vision.

WORK EXPERIENCE

Web Designer & Developer

Chattanooga Photo Booth Co. (Freelance, independent projects) | 04/2026 – 08/2026

Worked on independent design and web development projects for different clients, handling maintenance, adjustments, and customizations, as well as landing page design and development. Created interfaces and Design Systems to define visual structures and reusable components. Also migrated and rebuilt a product rental online store in WordPress, transferring and replicating its functionality.

Webmaster

Ariadna Communication Group | 08/2024 – 04/2026

Managed and optimized a large-scale corporate website in WordPress and Elementor, performing updates, building landing pages, and improving design and navigation with Figma. Implemented frontend customizations with HTML, CSS, and JavaScript, and applied on-page SEO strategies along with user behavior analysis using Google Analytics.

Achievements:

- Improved user retention by reducing the bounce rate by close to 30% and increasing average session duration from 50 s to over 2 min.
- Developed interactive tools such as product recommenders and digital experiences to enhance user engagement.
- Created a touch-based digital experience space for the company's physical offices.

Web Designer - Frontend Developer

Mercadeo Superior | 02/2023 – 02/2024

Designed and developed websites for various clients, managing projects across different CMS platforms. Built page sections and frontend adjustments on .NET-based sites, optimized platform performance by applying Core Web Vitals metrics, and implemented SEO projects along with AI-assisted content creation to improve search rankings.

Achievements:

- Carried out successful website migrations, ensuring proper launch and operational continuity.
- Developed and implemented an SEO strategy that increased organic user traffic.

- Automated content management using Advanced Custom Fields (ACF), streamlining and speeding up publishing.

EDUCATION
